SUMMARY

Passionate cybersecurity student with hands-on experience in web security, digital forensics, and penetration testing. Skilled in identifying vulnerabilities and developing secure solutions. Proficient in Python, Java, C++, and security tools such as Burp Suite, Autopsy, and Wireshark. Strong problem-solving, critical thinking, and teamwork abilities.

EXPERIENCE

Cybersecurity Intern – Kerala Police Cyber Crime Department

June 2025

- Contributed to real-time investigations and assisted in digital evidence analysis.
 - Supported cyber fraud and identity theft case resolution.
 - Worked with forensic tools to support law enforcement.
-

PROJECTS

Emotion Based Movie Recommendation System

- Developed a recommendation system analyzing user preferences.
- Enhanced recommendation accuracy using structured datasets and advanced algorithms.
- Technologies: Python, React.js, Node.js

Deepfake Biometrics Detection System

- Built a deepfake detection system using CNN models for real-time classification.
 - Combined facial biometrics and audio analysis (MFCCs) for accurate detection.
 - Technologies: Python, TensorFlow, Keras, OpenCV, dlib, Librosa, Tkinter.
-

TECHNICAL SKILLS

- Programming: Python, Java, C/C++, React.js, SQL, MySQL, Web Development, AI & ML,
 - Cybersecurity Tools: Kali Linux, Burp Suite, Wireshark, Autopsy,
 - Domains: Network Security, Digital Forensics, Web Security, Vulnerability Analysis
-

SOFT SKILLS

Teamwork | Time Management | Leadership | Effective Communication | Critical Thinking

LANGUAGES

English | Malayalam | Hindi | Tamil

CERTIFICATIONS & ACHIEVEMENTS

- Completed an internship on robotics at **KODACY & SPACE** in June 2022, gaining hands-on experience in automation and innovative robotic systems.
- **Python** Participated in a CTF challenge organized by Toyota, solving complex cybersecurity problems. Gained hands-on experience in vulnerability analysis and ethical hacking techniques.
- Completed Ethical Hacker internship offered by Networking Academy through the Cisco Networking Academy program in February 2025.
- Completed IBM's Python for Data Science course, gaining hands-on experience in Python, NumPy, Pandas, data visualization, and real-world data analysis

EDUCATION

BTech + MTech in Computer Science Engineering (Cybersecurity) 2021 – 2026

School of Cybersecurity and Digital Forensics, National Forensics Science University, Delhi Campus
